

Am ndments T The Claims

The Listing Of Claims will replace all prior versions, and listings, of claims in this application.

Listing Of Claims:

Claims 1 to 14 (Canceled)

Claim 15 (New): A tube packaging laminate having an appearance similar to a hologram, the tube packaging laminate is a multilayered material having a layer structure consisting of:

(a₁) one or more functional layers of plastic, arranged thereon

(a) a metal foil embossed over the whole or part of the surface, arranged thereon

(b) a multi-layered plastic layer which is transparent at least in some regions made from

(b₁) a layer of a lacquer coating or a melt extrudate, and

(b₂) a film containing a polyolefin arranged on the layer (b₁),

optionally, at least one printed image or pattern or both between the layer (b₁) and the film (b₂), the at least one printed image or pattern being counterprinted in the layer (b₁) or the film (b₂) or both,

optionally, at least one printed image or pattern or both on or counterprinter or both in surface of the film (b₂).

wherein the embossed design is a grid or a regularly or irregularly repeating pattern, and the layer (b₂) forms the outer-lying layer on the tube packaging and the embossed design of the metal foil (a) is visible through the transparent regions

of the plastic layer (b), surface of the functional layer (a₁) that is next to the metal foil (a), away from the metal foil (a) is plane, surface of layer (b₁), that is next to the metal foil (a), away from the metal foil (a) is plane except for any recesses for the optional counterparts printed images or patterns or both.

Claim 16 (New): The tube packaging laminate according to Claim 15, wherein the pattern of the embossed design is a damask pattern or a small worm design.

32
B
Claim 17 (new): The tube packaging laminate according to Claim 15, wherein the layer structure contains one after another:

(a₁) a functional layer of a film containing at least one polyolefin in a thickness of 20 to 150 μm , and

a lacquer coating or a melt extrudate of a polyethylene in a quantity of 3 to 80 g/m^2 ,

(a) a metal foil embossed completely or over part of the surface in a thickness of 7 to 100 μm ,

(b) a multi-layered plastic layer made from

(b₁) a lacquer coating or a melt extrudate of a polyethylene, in a quantity of 3 to 80 g/m^2 , and

(b₂) a film containing at least one polyolefin in a thickness of 20 to 200 μm

Claim 18 (New): The tube packaging laminate according to Claim 17, wherein the polyolefines of functional layer (a₁) are polyethylenes and/or polypropylenes.

Claim 19 (New): The tube packaging laminate according to Claim 17,
wherein the metal foil (a) is an aluminum foil.

Claim 20 (New): The tube packaging laminate according to Claim 17,
wherein the polyolefins of the film (b₂) are polyethylenes and/or polypropylenes.

Claim 21 (New): The tube packaging laminate according to Claim 15,
wherein the packaging material forms a tube body and the layer structure contains
one after another:

32
B
(a₁) a functional layer, that on the tube points inwards, of
a polyethylene film of a thickness of 40 to 80 μm , and
a lacquer coating or a melt extrudate of polyethylene in a quantity of 30 to 50 g/m^2 ,

(a) an aluminum foil embossed completely or over part of the surface in a
thickness of 8 to 40 μm ,

(b) a multi-layered transparent plastic layer made from
(b₁) a lacquer coating in a melt extrudate of polyethylene in a quantity of 30 to 50
 g/m^2 , and
(b₂) a polyethylene film of a thickness of 20 to 200 μm , which forms the outer side
on the tube.

Claim 22 (New): The tube packaging laminate according to Claim 15,
wherein the film (b₂) optionally has a printing pattern on one or both sides.
